

| Graduate Attribute | Name of the activity Date of completion | Experience and Understanding |
|--------------------|--|---|
| | Potential. ly- 2022.7.10 | I tasted my MBTI, to be honest when I was a high school student I am ENTP, but now I am ENTJ. I think it helps me understand my change. |
| | Open Day- 2022.10 | I go to the school of art to visit the art workshop. It has a lot of amazing equipment. I study how to use it. |
| | Course induction –2022.10 | I went on a tour of the jewellery college, where I will be enrolled, and learnt about the course. I found that the courses and production methods are very diverse and international. It is dedicated to teaching us to create and express ourselves better. |
| | City Year - Public Speaking- 2022 | At the end of the term I gave a presentation and more importantly others had to evaluate it for me. I had classmates and teachers from different countries which was good or interesting. Because sometimes the different cultures and ways of thinking and upbringing make them think in a slightly different logic and starting point. This was very helpful to me. |
| | Attending a Workshop- 2023 | I took part in an art workshop through which I learned all sorts of interesting painting techniques. I also discussed a lot of things related to art with my classmates and learnt about the art styles of different countries. |

| | | |
|--|---|--|
| | SWOT of Personal Development Plan- 2023.2.1 | I wrote a SWOT analysis of my final work last semester based on the SWOT advice given by BCU, which gave me a clearer picture of what I had to improve this semester. |
| | STAR Technique | |
| | IT Induction- 2022.21.11 | I have been to the IT department twice and the printing place once. I found that it is the funniest and clearest way to ask for help from relevant departments if there are related problems. |
| | Personal Tutor meeting- 2022.21.11 | I went to talk with my tutor, and we talked about the works and the major we chose in the future. It reassures me to confirm that I have chosen a suitable major. |
| | Library Induction- 2022.10 | I entered the school library and the teacher took us through how we should borrow books how to do group work in the library, how to get a library account and so on. This helped me a lot with my text research work afterwards. |
| | Success Course- 2022.21.11 | I have taken a lot of classes since I started school, of which I have already completed the first semester. I think my goals are becoming clearer over the course of completing the course. I also have an understanding of what I want to do in the future. It has been very helpful for me to plan for the future. |

| | | |
|--|--|---|
| | Assistance center- 2022 | I once signed up for an English class with Stephen Deane and the focus of that class was mainly on grammar. As a non-native speaker of English, grammar is one of my weaknesses. After studying I found that it was more efficient to learn something I was not good at and didn't really like than to learn it on my own with someone teaching me. |
| | City Year - A year to make a Difference in Education- 2023 | During this year I have come to BCUIIC and I think the most important thing is that I have learnt new ways of learning and presenting myself. As well as gradually being able to make directional and flexible plans for the future. |
| | Welcome Week- 2022 | Sadly my welcome day was attended online. But nevertheless the online presentation of the campus was very clear. This allowed me to know where I should get more professional help and support. |
